

**OPERATE**

»Operate™« is the name of our extensive package of services for extending the service life of your concrete block molds. This not only includes specific measures on the mold, but also seminars and workshops directly matched with your products.

We also bring together our research & development activities for continuous improvement of our product quality under »Operate™«.

**Mold making cost efficiency**

Innovative solutions for cost control and careful use of resources in production are of great significance for our worldwide customers. To achieve this, the concrete block mold must combine different aspects of effective production. The mold needs to excel through cost efficiency for long use, precision for high-quality products, and well-engineered designs for fast and simple repair in case of wear. With

**ALWAYS AT YOUR SERVICE.**

the modular concrete block mold and services specially tailored to your production process, the service life can be increased significantly.

**TOOLS. Molds.**

**CARE. Service.** Powered by experience.

**EXPERTISE AT YOUR SIDE.**

**Wearing part replacement**

The objective of the KOBRA modular concept is to ensure the reparability of the concrete block mold and the reusability of individual components and assemblies, with the goal of achieving the most cost-efficient production of concrete products. The basic idea is a design which enables wearing mold parts to be replaced faster, without having to also replace the assemblies that are still usable.

Depending on the specific mold, wear parts can be replaced not only in our Service Center, but also directly on site in the production plant. KOBRA offers special seminars and workshops on the changing of wear parts, in which the

fast exchange of wear parts

necessary technical knowledge as well as tips and training for handling difficult aspects are taught, tailored to your products.

**WE ARE HERE FOR YOU.**
