

OPERATE

»Operate™« is the name of our extensive package of services for extending the service life of your concrete block molds. This not only includes specific measures on the mold, but also seminars and workshops directly matched with your products.

We also bring together our research & development activities for continuous improvement of our product quality under »Operate™«.

Mold making cost efficiency

Innovative solutions for cost control and careful use of resources in production are of great significance for our worldwide customers. To achieve this, the concrete block mold must combine different aspects of effective production. The mold needs to excel through cost efficiency for long use, precision for high-quality products, and well-engineered designs for fast and simple repair in case of wear. With

ALWAYS AT YOUR SERVICE.

the modular concrete block mold and services specially tailored to your production process, the service life can be increased significantly.

TOOLS. Molds.

CARE. Service. Powered by experience.

EXPERTISE

Service provided directly on site

Innovative Serviceleistungen

We not only want to be our customers' supplier but also their partner. These include services which cover all the phases of a mold's life.

We work continuously on improving our service portfolio, so that we can fulfill all our customers' requirements. In addition to specific measures for extending the service life of a mold, we also offer customized training courses and workshops for your employees and, within the scope of several projects, we work with universities, colleges and industry associations on developing our technology further.

Forschung & Entwicklung

KOBRA has an in-house research & development department and works on interdisciplinary projects together with universities, colleges and industry associations.

In our in-house product development, our R&D engineers form the interface between the design department and our service team to bring together theory and practice. Working hand-in-hand, both departments produce new solutions, and optimize and maintain existing products. Practical reports from our international customers on

the performance of the concrete block molds in use form the basis for further development of our technology. After in-house tests, new products are tested under real conditions in consultation with our customers. In this way we can ensure comprehensive testing of our innovations.

**WE ARE
HERE FOR YOU.**
